Opinions on Weblinks

Introduction

We report the flow and exact wording of the survey instrument used in a URL reading experiment designed to systematically evaluate web users ability to read URLs and recognise their safety perception of different structures. The survey was implemented using Limesurvey and conducted in April 2017. On the other hand, the survey rational, design process and results are reported in [1].

The survey consists of four main parts with the flow illustrated in Figure 1:

1. Consent

2. Instruction and Comprehension Question

3. URL Reading Trials

4. Demographics and Post-Survey Questions

Figure 1 – Illustrating the survey flow and the URL block template. See the full text of the instructions in section 2, and the demographics and post-survey questions in section 4. All URL Trials are presented in section 3

The following pages depect how the survey was presentd to participants verbatim with the following caviots:

- Section and subsection titles were not shown to participants and are there only for logical signposting.

- Subsubsection titles containing URLs were shown to participants as an image, so they could not be copied easily. The subsubsection number was obviously not shown to participants.

- Anything marked *Note:* or in *italics* is commentary on survey logic and was not shown to participants except for Q83-Q85 in the post-survey questions section 4; where we inform participants that their answers to those questions will not affect their payment in any way.

1 Consent Statement

The following survey will ask you to read **23 (URLs)** and state where you think each link would go if you were to visit it. The survey should take less than **15 minutes** to complete. The research is being conducted to better understand how people read and understand links.

Participating in the survey is voluntary, you may choose to leave the survey at any time. Questions marked with a ***** are not optional and must be filled in to progress. Answers and any free text you provide may be used in research publications. The research is being conducted by the University of Edinburgh and conforms to ethical standards. **Please contact Dr Kami Vaniea (kvaniea@inf.ed.ac.uk) if you have any questions or concerns.**

1. **I attest that I am over 18 years old, have read the above description, and wish to take part in the survey.**

   ○ Yes, take me to the survey.

   ○ No, do not continue with the survey.

   Note: When a participant chooses "Yes, take me to the survey", they are directed to the instructions section. Otherwise, they exit the survey.

2 Instructions

The links (URLs) in this survey are fictitious, they are designed to help us understand how people read links and predict where they will go before clicking. **Do not type in any of the presented links.** For all following questions, please read the link and state where you think the link would lead if you were to type it into a browser. We are interested in your predictions, not where the links actually lead, so please do not type the links in.

2. **What do you need to do in this survey?**

   ○ Type in the links and report where they go

   ○ Read links and predict where they will go

   ○ Click on links and check if the page is still live

   Note: Once a participant choose "Read links and predict where they will go", they are directed to the URL Reading Trials. Otherwise, they are directed to re-read the instructions and answer the question again.

3 URL Reading Trials (Varied by participant group)

Questions were shown in blocks with three elements: 1) the URL shown as an image, 2) a multiple choice question about the URL destination, and 3) a multiple choice question about the URL safety. See the paper for a detailed description of the question design and reasoning [1]. The destination prediction question answers were shown in a randomized order and include two parts of the URL (typically the subdomain and domain), a distractor answer (i.e. Google), "redirects to another website with a longer link", "a website which is not listed", and an "other" option where the participant could provide a free-text response. In cases where a second part of the URL did not exist (i.e. microsoft.com) a second distractor answer was used instead. The answer options in question 2 were a 5-likert scale identical for all URLs and presented in a fixed order.

The content is automatically customised based on two factors:

- **The recruitment platform of the participant (Amazon Mechanical Turk (AMT) or Prolific Academic (PA))** *determines which one of the two following URLs are included in the survey: https://mturk.com or https://prolific.ac.*

- **The participant group number (Group 1 or Group 2); which is randomly assigned once the consent form is signed.** *The group number determines which set of the 12-single subdomain URLs are included in the survey.*

For readability, we present the URL trials in their logical order, but in the real survey the URL trials were presented in a random order as illustrated in the flow diagram in Figure 1.

3.1 Domain URLs (All Participants)

3.1.1 https://google.com

3. *If you were to type in the above link into a web browser, what website would open?
- ○ Mobile's website
- ○ Facebook's website
- ○ Samsung's website
- ○ Redirects to another website with a longer link
- ○ A website which is not listed
- ○ Other:——————————————————

4. *How safe do you think it would be to click on the link above if you saw it in an email from someone you know?
- ○ Not safe
- ○ Somewhat unsafe
- ○ Neutral
- ○ Somewhat safe
- ○ Very safe

3.1.2 https://microsoft.com

5. *If you were to type in the above link into a web browser, what website would open?
- ○ Twitter's website
- ○ Facebook's website
- ○ BBC's website
- ○ Redirects to another website with a longer link
- ○ A website which is not listed
- ○ Other:——————————————————

6. ***How safe do you think it would be to click on the link above if you saw it in an email from someone you know?**
   ○ Not safe
   ○ Somewhat unsafe
   ○ Neutral
   ○ Somewhat safe
   ○ Very safe

3.2 Domain URLs (Prolific Academic participants Only)

3.2.1 https://prolific.ac

7. ***If you were to type in the above link into a web browser, what website would open?**
   ○ Facebook's website
   ○ Twitter's website
   ○ Prolific's website
   ○ Redirects to another website with a longer link
   ○ A website which is not listed
   ○ Other:⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯

8. ***How safe do you think it would be to click on the link above if you saw it in an email from someone you know?**
   ○ Not safe
   ○ Somewhat unsafe
   ○ Neutral
   ○ Somewhat safe
   ○ Very safe

3.3 Domain URLs (Amazon Mechanical Turk participants only)

3.3.1 https://mturk.com

9. ***If you were to type in the above link into a web browser, what website would open?**
   ○ Facebook's website
   ○ Twitter's website
   ○ Amazon Mechanical Turk's website
   ○ Redirects to another website with a longer link
   ○ A website which is not listed
   ○ Other:⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯

10. ***How safe do you think it would be to click on the link above if you saw it in an email from someone you know?**
    ○ Not safe
    ○ Somewhat unsafe
    ○ Neutral
    ○ Somewhat safe
    ○ Very safe

3.4 Single Subdomain URLs (Group-1 Participants Only)

3.4.1 https://facebook.profile.com

11. ***If you were to type in the above link into a web browser, what website would open?**
    ○ Facebook's website
    ○ Profile's website
    ○ Samsung's website
    ○ A website which is not listed
    ○ Redirects to another website with a longer link
    ○ Other:

12. ***How safe do you think it would be to click on the link above if you saw it in an email from someone you know?**
    ○ Not safe
    ○ Somewhat unsafe
    ○ Neutral
    ○ Somewhat safe
    ○ Very safe

3.4.2 https://mobile.twitter.com

13. ***If you were to type in the above link into a web browser, what website would open?**
    ○ Mobile's website
    ○ Twitter's website
    ○ Samsung's website
    ○ A website which is not listed
    ○ Redirects to another website with a longer link
    ○ Other:

14. ***How safe do you think it would be to click on the link above if you saw it in an email from someone you know?**
    ○ Not safe
    ○ Somewhat unsafe
    ○ Neutral
    ○ Somewhat safe
    ○ Very safe

3.4.3 https://profile.travelbuddy.com

15. ***If you were to type in the above link into a web browser, what website would open?**
    ○ Profile's website
    ○ TravBuddy's website
    ○ Google's website
    ○ A website which is not listed
    ○ Redirects to another website with a longer link
    ○ Other:

16. ***How safe do you think it would be to click on the link above if you saw it in an email from someone you know?**
    ○ Not safe
    ○ Somewhat unsafe
    ○ Neutral
    ○ Somewhat safe
    ○ Very safe
